

Disclaimer: Although we aimed at the highest level of accuracy when preparing this document, errors are possible. Users of the MTUS dataset do so at their own risks! Note also that the User's Guide thoroughly documents the recoding of the harmonized variables for the Release 2 version of World5.5 datasets. An earlier version of the harmonized dataset is available for a larger number of surveys (World5.0). These additional surveys have not yet been checked for cross-survey consistency. They will be gradually be checked and added to future releases.
